A B O U T

Bryan Byrd has over 25 years of project and construction management experience. Mr. Byrd has provided construction management services, performed cost and schedule analyses on numerous domestic and international projects, including engineering, procurement, construction, design-bid-build, EPC/EPIC, and design-build work scopes. Mr. Byrd is knowledgeable of common practices in the construction industry such as estimating, contracting, risk analysis, project management, coordination, change management, project administration, safety, schedule preparation and analysis, project controls, cost control, completion, and project close-out. Mr. Byrd's experience includes numerous domestic projects with work scopes ranging from approximately \$1 million USD to international projects with work scopes in excess of \$8 billion. Mr. Byrd has successfully assisted clients with the resolution of several hundred complex construction and engineering disputes in over 30 countries around the world. Mr. Byrd has served as a construction management, scheduling, and construction cost expert and testified on project and construction management issues as well as construction practices, critical path delay, acceleration, schedule compression, disruption, construction costs and damages on domestic matters in arbitration and State and Federal courts as well as international venues.
